

Salary Survey

Frequently Asked Questions: Surveys and TASB HRDataSource™

Who can participate in the salary surveys?

Invitations to the salary survey are sent to public school districts (ISDs) and community colleges in Texas. The district's HR Services salary survey contact or program contact receives the survey invitation, and additional contacts may receive a reminder that the survey is available.

I participated in a salary survey and I want the results. Where do I find them?

For HR Services subscribers, results will be shared in TASB HRDataSource, which is available through myTASB.

For non-subscribers, survey highlights of the most recent year's results of the Superintendent and Teacher salary surveys can be found on our [website](#) after data analysis is completed.

How do I get access to TASB HRDataSource?

HR Services subscriber contacts can log in to TASB HRDataSource through myTASB. In the myTASB programs menu, click the TASB HRDataSource link under the HR Services heading. If you are not set up as a contact for your organization, we can provide information about who manages the HR Services subscription for your organization.

If your organization has not subscribed to HR Services, please contact us at 800.580.7782 or send an e-mail to hrservices@tasb.org.

Where can I find a list of the job descriptions associated with the job titles used in the survey?

For a complete list of job descriptions, please check out the [TASB HRDataSource webpage](#). Sample surveys with all questions, benchmark titles, and job descriptions are available to download.

When will the latest survey results be available?

An e-mail is sent to subscriber contacts once the results are available. A schedule of the anticipated result release dates can be found on our [Salary Surveys page](#).

Can I compare my district to other peer districts using the survey data?

In TASB HRDataSource, you can create custom salary reports. It gives you the ability to select individual districts for your comparison purposes, as well as offering you other selection criteria such as enrollment size and ESC region.
